

The Islamabad Accords

A Peace Plan Synthesized for Donald Trump · the road, top to bottom

Ending the October 7th Firestorm
Ensuring Iran Never Develops a Nuclear Weapon
Building a New Security Architecture for the Middle East

1

TRANSACTIONAL PHASE card 1

A ceasefire and three deals

Agree the three deals as the agenda, then redeclare the ceasefire across all fronts, Gaza and Lebanon included

- **Hormuz standstill** · freeze the maritime conflict · mutual stand-down: the US naval blockade lifts, Iran's attacks on the strait halt · nobody formally concedes sovereignty, transit rights, or economic arrangements
- **Nuclear bargain** · three gates: IAEA access, HEU downblended in place, custody of the rest · \$6B, \$5B, \$15B released as each closes
- **Reconstruction tranche** · \$25B of Iran's frozen assets · 25% to Gaza & Lebanon, matched dollar for dollar by the Board of Peace · on agreement of the architectural phase, the wartime escalation unwinds

2

END OF WAR card 2 · card 3

The All-Fronts Hudna

The permanent termination of war promised in MoU Art. I · US, Iran, and their respective allies

- A **10–15 year armistice** · the Axis disengages from Israel and US forces
- **Reciprocal non-aggression** · the US guarantees Israel's compliance; both pursue their interests through the architecture
- **Trump's Comprehensive Plan** as the pathway for Palestinian self-determination, with no competing end-state

3

ARCHITECTURAL PHASE card 2

Five institutions, five trades

Iran performs, a regional institution verifies, money and sanctions relief move, and the exchange settles with finality

- **The Table** for the war itself · **the Consortium**, nuclear · **the Commission**, Hormuz · **the Forum**, arms and presence · **the Fund**, reconstruction
- **Sanctions relief and asset releases** · the compensation and compliance layer beneath all five
- **The Board of Peace** inaugurates the institutions and hosts the signing · the region governs thereafter

4

POLITICAL SETTLEMENT card 3

What each side actually commits

Every track is an exchange · settled exchanges ideally stay settled over a crisis on another track

- **Nuclear** · near-zero enrichment for 10–15 years, one protected research cascade below 1%, and zero HEU · the right to enrich recognized, then a supervised ramp to a 1.5–3.67% ceiling
- **Hormuz and arms** · the strait reopens, sovereign rights acknowledged · restraint on missiles, American presence, and regional arsenals
- **Reconstruction** · a 25% carve-out after the nuclear gates, roughly \$20B, matched by the Board of Peace · a ~\$500B regional program

5

REGIONAL DÉTENTE card 4

~15 years · the waypoint

Fifteen years without major conflict, alongside real if uneven progress across the five tracks

- **Major incidents are expected** · the institutions exist to keep them from cascading into another regional war
- Near-zero enrichment gives way to the supervised ramp

6

REGIONAL NORMALIZATION card 4

20 to 30 years · the capstone

Diplomatic relations among all the states of the region, with the end of US-Iran enmity as the keystone

- **Not warmth** · a channel that holds under stress · every capital can reach every other in an emergency · a Middle East that secures itself
- Earned on the cumulative record · generated by the institutions, not claimed
