A COVER, FIVE NUMBERED CARDS, AND REFERENCES

The Islamabad Accords

A Peace Proposal for Donald Trump

David Hanna Jr.

X.COM/THEKINGDAVIDJR

Unofficial · a private author's proposal · 51 checked sources · October 2026 · AI disclosure at the end

COVER · A GENERATIONAL SETTLEMENT · IN SIX CARDS

Ending the October 7th Firestorm

two phases · five institutions · one mechanism · 20 to 30 years

The Islamabad MoU was a skeletal framework for a deal without a destination. The core of this is a regionally owned architectural framework that attempts to implement the spirit of the agreement, using pieces that have already been proposed by the international community, synthesized into a coherent vision for Trump to own.

A framework for Trump's team and the experts to critique, tear apart, and reconstruct into a proper end-of-war settlement

THE CLEARING AND SETTLEMENT LOOP · in four sentences

1 Iran performs, a regional institution verifies, money and sanctions relief move, and the exchange **settles with finality**.

2 That is the ideal loop, the fast path, repeated for a generation.

3 When a crisis hits, the regional architecture acts like a ratchet: reversing a settled exchange is slower, costlier, more visible, and felt by more parties · resume from where you stopped, not from zero.

4 Quit outright and you keep what's closed and lose everything still open · which is designed to be worth more every year, as trade and long-term investment replace frozen assets and temporary waivers.

TRANSACTIONAL PHASE	ARCHITECTURAL PHASE	~15 YEARS	20 TO 30 YEARS
a ceasefire and three deals	*five institutions · five trades*	*the waypoint · regional détente*	*the capstone · full regional normalization*

THE SET

1 The Transactional Phase — *a ceasefire and three deals · freeze Hormuz, de-escalate the nuclear file, rebuild the Middle East*

2 The Architectural Phase — *five institutions · the generational settlement*

3 The Architectural Phase — *five trades · what each side actually commits*

4 The Generational Horizon — *the waypoint and the capstone*

5 What the Architecture Cannot Do — *limits, stated up front*

REF References — *a mosaic found in the Doom Scroll*

Why listen to me?

- I'm a code monkey, born and living in the seat of the nation, that simply obsessively follows geopolitics
- I'm an outsider: no political agenda, financial incentive, or reputation to protect, and none of the professional cynicism · a healthy dose of naivete
- This started as a way to understand the Israeli-Palestinian conflict · after 7 October the US-Iran war was obvious, so I set a delusional goal: a peace framework for the next president, most likely Trump
- Judge the plan itself · the receipts from the doom scroll are all here: 51 sources

Why Trump

a plan for a businessman

1 THE GAP

- A deal without a vision will not last · we have already seen that with the MoU
- Moving forward takes two things: a vision and political will
- Plenty of regional architectures have been proposed: a Helsinki process, which the Saudis now push as Helsinki-lite · an ASEAN Regional Forum for the Gulf · Iran's Hormuz Peace Endeavour
- None of them are Trump-flavored, and no credentialed analyst has proposed such a thing

2 WHY HIM

- He's the most powerful person in the world
- It's his war · his 2nd term's signature policy in the Middle East, next to the 20-point plan
- "Run from the Middle East" is not a thing Trump can own
- The only thing that beats capitulation is a creative grand vision he can own
- A prize that big gives him the incentive and the room for maneuver any real deal requires

3 WHY WOULD TRUMP TAKE A PLAN?

- He already has · the 20-point plan came through a long, very collaborative process, and his power and influence got it over the line
- Its contours already existed: the previous administration, regional partners, and Blair's GITA
- His goals are well known: contain Iran's nuclear program and expand normalization · the architecture is an implementation detail

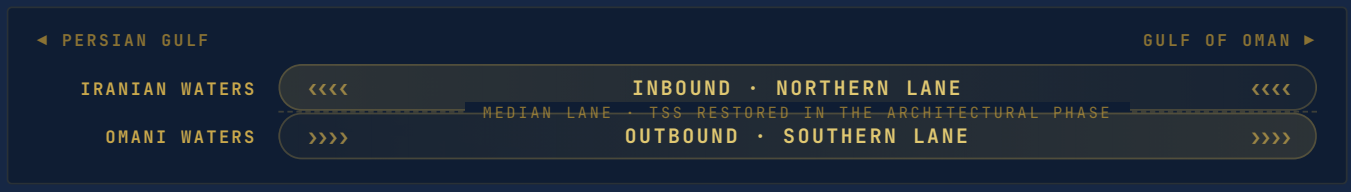

Freeze Hormuz, De-escalate the Nuclear File, Rebuild the Middle East

agree the three deals as the agenda, redeclare the ceasefire, then negotiate them in parallel

RECOMMITMENT TO CESSATION *rain on the firestorm*

A recommitment to the cessation of armed hostilities across all fronts, Gaza, Lebanon and Yemen included, to be formalized into the All-Fronts Hudna, the war-ending armistice, in the architectural phase.

HORMUZ STANDSTILL *freeze the maritime conflict*

ADAPTED FROM THE IRAN–OMAN ROUTE TALKS (JUL–AUG 2026, STILL MOVING) · THE OUTBOUND LANE STAYS OMANI

No-prejudice: nobody formally concedes sovereignty, transit rights, or economic arrangements. Holds until the architectural phase settles the strait.

Sovereign and military fleets excepted

- The lane arrangement governs commercial traffic
- Any state's warships and government vessels, and the coastal states' state-owned commercial fleets, transit by either route, in recognition of sovereign interests, rights, and balance of power

Oil for oil: Iranian energy exports pass the US blockade; Iran's attacks on energy shipping halt. Food and medicine pass both ways. The rest lifts at the Armistice Gate.

The oil waiver returns

- Restored under MoU ¶10 once the June US–Iran deconfliction cell is staffed and operational
- Worth real money inside an architectural roadmap

NUCLEAR BARGAIN *de-escalate the file without resolving it*

GATE N1	GATE N2	GATE N3 · ARCHITECTURAL PHASE
IAEA access restored, verification baseline set	HEU downblended in place, verified, per MoU Art. 8	Custody of remaining material, on architectural-phase terms
$6B+ QATARI ACCOUNTS RELEASE	**$5B+** RELEASES	**$15B+** RELEASES

- Released to Iran **without restriction on use**
- These are Iran's own assets, unfrozen under the MoU ¶11 procedure

FIGURES TRACK AMOUNTS REPORTED BY AXIOS DURING THE 2026 NUCLEAR NEGOTIATIONS

RECONSTRUCTION TRANCHE *the mutual down payment on regional stability*

$25B

of Iran's frozen assets, on **agreement of the architectural phase**

AT LEAST A 25% SHARE · PUBLIC TRUST

$6.25B CARVE-OUT + $6.25B BOP MATCH = $12.5B GAZA & LEBANON

75% BALANCE

to **Iran**, through approved channels

EVERY SUBSEQUENT ASSET RELEASE CARRIES AT LEAST A 25% SHARE · NUCLEAR-TRACK PAYMENTS EXEMPT

What counts as agreement of the architectural phase

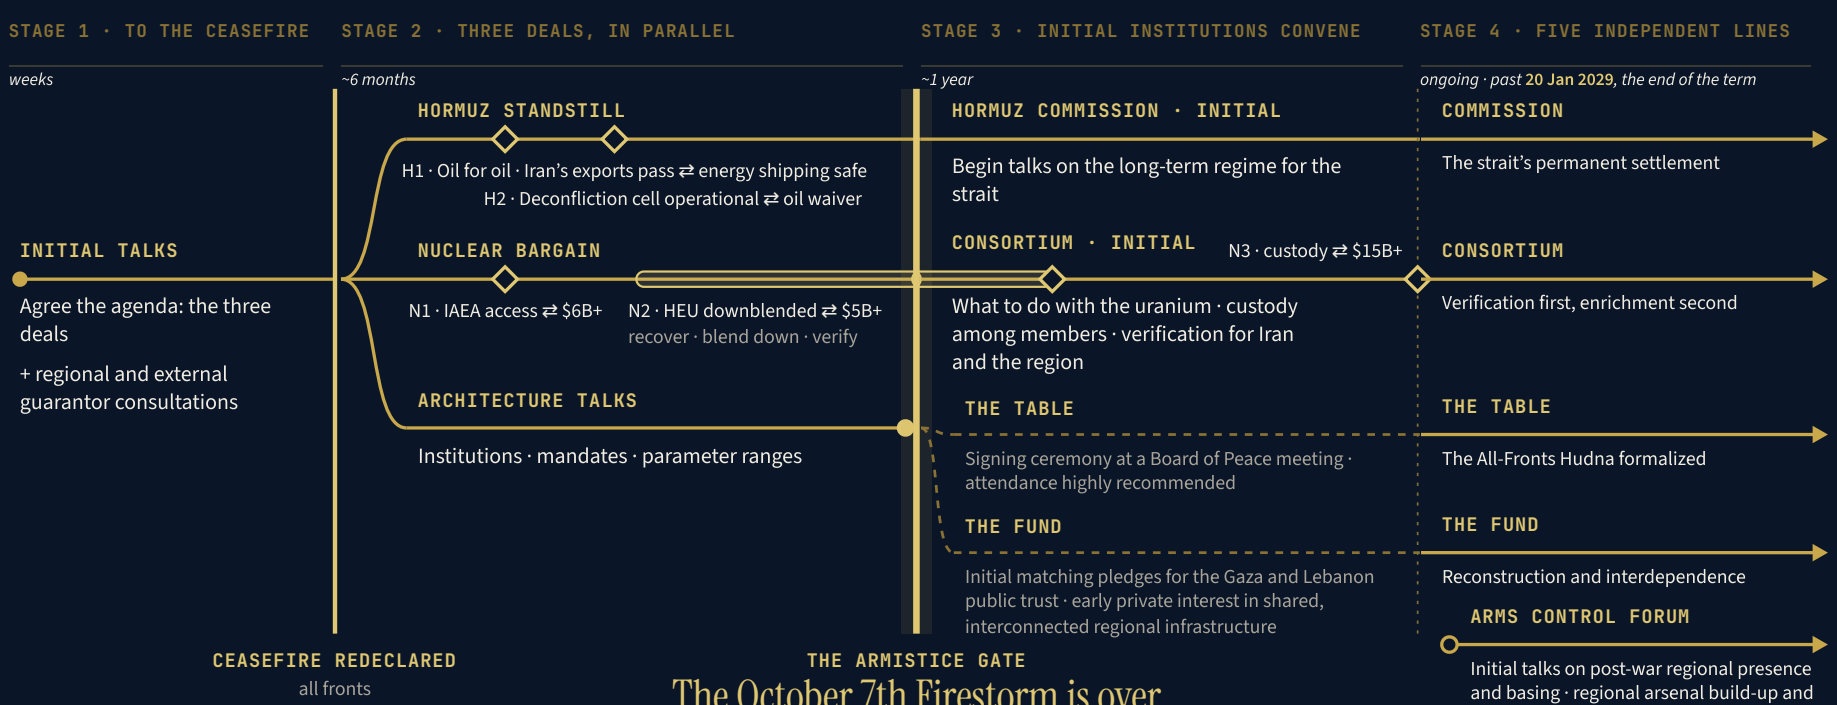

- Acceptance of the five institutions
- Acceptance of their general mandates and initial files
- Agreement on the range of the negotiating parameters: enrichment percentage, duration, money · not a particular figure, the range on the figures
- Agreement on the set of candidate nations that could assist in each institution

On agreement, the wartime escalation unwinds: US forces surged for the war are withdrawn, the sanctions imposed since the June MoU are lifted, the rest of the naval blockade lifts as all commercial shipping passes freely, and an armistice ending the October 7th Firestorm is declared.

The agreed architecture is endorsed by a UN Security Council resolution, as the 20-point plan was.

THE PROPOSED SEQUENCING · FROM THE TALKS TO THE ARCHITECTURE

Three deals, one gate, five institutions

The Generational Settlement

five files · five regionally owned institutions, each with its own members, milestones, and rules of procedure

THE WAR ITSELF

Middle East Peace and Parley Table

The region and its immediate neighbors · every seat is unconditional

MANDATE · STANDING VENUE AND MEDIATION

- A realistic substitute for what MoU Art. 12 called for
- Neutral ground for deals and deconfliction
- Intensive mediation of cross-cutting incidents the other institutions do not contain
- Non-aggression, restoration, and normalization agreements · brokered here when parties seek them, alongside the region's own ad hoc diplomacy
- Minimum bureaucracy, maximum agility

THE INITIAL FILE · ALL-FRONTS HUDNA

The permanent termination of war promised in MoU Art. 1 · US, Iran, and their respective allies.

ANTI-MANDATE · WHAT THE TABLE IS NOT

- **Not a Middle East UN**
- A seat is not normalization · the Table is built for enemies to sit safely across from each other
- Not a voting body · issues no resolutions
- Assigns no fault · commands no forces
- Holds no standing over the other four institutions · no secretariat beyond what convening negotiations requires

UNCONTAINED DISPUTES RISE TO THE TABLE · NO AUTHORITY FLOWS DOWN

NUCLEAR

Middle East Atoms for Peace Consortium

Iran · Pakistan · Türkiye · Gulf states · each party's guarantor seated: Russia, China, the US

MANDATE

Prevents nuclear proliferation in the Middle East, by guaranteeing and verifying the region's civilian nuclear programs · with shared enrichment as an optional extension, once verification is established

INITIAL FILE

Iran's program: custody of the exported stockpile, verification of its remaining enrichment capabilities, and the negotiated terms guaranteed alongside the IAEA

HORMUZ

Hormuz Freedom & Prosperity Commission

Iran & Oman as littoral states · Gulf states · major transit users

MANDATE

The free and non-discriminatory flow of commerce through the strait

INITIAL FILE

The strait's **permanent settlement**: navigation, demining, deconfliction, transit rights, and the **economic arrangements** that go with them

ARMS & PRESENCE

Peace Through Strength Arms Control Forum

Iran · Israel · Gulf states · foreign powers with regional forces

MANDATE

Arms control for the whole region: arsenals, foreign military presence, and arms to non-state actors

INITIAL FILE

The war's military aftermath: Iran's missiles, drones and proxies, and post-war American presence and basing

RECONSTRUCTION

Peace in the Middle East Reconstruction Fund

Public trust + private investment vehicle

~$500B

REGIONAL PROGRAM

MANDATE

Rebuilding the region, with shared, interconnected infrastructure as the focus

INITIAL FILE

The war's reconstruction: the public trust for **Gaza & Lebanon**, matched dollar for dollar by the Board of Peace, within the ~$500B regional program

FIVE LOOSELY COUPLED TRACKS · **THE OPERATING IDEAL:** EACH KEEPS OPERATING THROUGH A CRISIS ELSEWHERE · SETTLED EXCHANGES STAY SETTLED

Board of Peace | Inaugurates the institutions and hosts the signing · **the region governs thereafter**.

What Each Side Actually Commits

every track is an exchange, and the layer beneath them all

TRACK	IRAN & ITS ALLIES COMMIT		THE US & THE REGION COMMIT
🕊️ **ALL-FRONTS HUDNA** *at the Table*	• Accept **Trump's Comprehensive Plan** and its "credible pathway to Palestinian self-determination and statehood" • Commit to a **10–15 yr** armistice and disengagement of the Axis toward Israel & US forces, contingent on the pathway not being foreclosed	⇄	• **Reciprocal non-aggression and disengagement** toward Iran and its allies • The US guarantees Israel's compliance; both pursue their interests **through the architecture**, not around it
⚛️ **NUCLEAR** *in the Consortium*	• Near-zero enrichment for **10–15 yrs** · one protected research cascade below **1%**, under Consortium verification • Every other facility sealed under continuous IAEA watch • **Zero HEU** for the duration • The existing stockpile part downblended in place and kept under seal, the rest exported to Consortium custody	⇄	• Recognition of Iran's **right to enrich** under the NPT, via the Consortium, including on Iranian soil • Then a supervised ramp to a **1.5–3.67%** ceiling • Saudi Arabia and any other domestic enrichment program under the same verification • The three nuclear gates of card 1 paid as each closes
⚓ **HORMUZ** *in the Commission*	• The strait reopens in practice • **Joint mine-clearing**, naval deconfliction, and free, non-discriminatory flow of commerce • **Return to the IMO traffic separation scheme** once the architecture stands	⇄	• Iranian and Omani **sovereign rights openly acknowledged** • A transit revenue framework carriers can pay into **without sanctions exposure** • The Malacca Cooperative Mechanism as precedent
🛡️ **ARMS & PRESENCE** *in the Forum*	• Restraint on **short- & medium-range** missiles and drones • **No intercontinental development**, ever • Limits on arming non-state actors	⇄	• Economic and diplomatic integration • **Restraint on American military presence** and **regional arsenals**, negotiated in the Forum • The same limits on arming non-state actors
🏗️ **RECONSTRUCTION** *in the Fund*	• A **25%** carve-out from every asset release beyond the nuclear gates, roughly **$20B** across the lifetime of the architecture, into the public trust for **Gaza & Lebanon**	⇄	• The remaining **75%** released to Iran • Dollar-for-dollar match by the Board of Peace, roughly **$20B** across the lifetime of the architecture, on top of the **$17B** already pledged • A **~$500B** regional program, starting with **cross-border infrastructure** · Iran's own rebuild joins once the architectural record supports it

THE ONE COUPLING, NOT DESIGNED · AMERICAN FINANCIAL LEVERAGE TOUCHES EVERY TRACK

Sanctions Relief & Asset Releases

Not a sixth track · **the compensation and compliance layer beneath all five**

FLOORS

Settlement finality: a closed exchange ideally **stays closed** · reopening it is a visible move against everyone who relies on it

GATES

Delivery versus payment: each future tranche tied to **specified performance** in its own track.

BREACH

- **Breaches are inevitable** as sides continually assess the architecture's value
- What the institutions cannot contain goes to the Table for intensive mediation

TERMINATION

- **Waivers first**
- Permanent termination only when the architecture's record supports the certification to Congress

The Waypoint and the Capstone

whatever portion of the horizon the region actually gets, verified progress is kept

~15 YEARS

THE REALISTIC OUTCOME

Regional Détente

- Fifteen years without major conflict, alongside real if uneven progress across the five tracks
- **Major incidents are expected** · the institutions exist to keep them from cascading into another regional war
- Near-zero enrichment gives way to the supervised ramp

20 TO 30 YEARS

THE CATASTROPHIC SUCCESS

Full Regional Normalization

- *Diplomatic relations among all the states of the region, with* Israel–Iran relations as the keystone
- *Not warmth · a channel that holds under stress*
- *A Middle East where every capital can reach every other in an emergency*
- *A Middle East that secures itself · regional rivalries settled at its own table*

EARNED ON THE CUMULATIVE RECORD · GENERATED BY THE INSTITUTIONS, NOT CLAIMED

IRAN & ITS ALLIES

- ◆ NO WEAPONS-GRADE ENRICHMENT
- ◆ NO INTERCONTINENTAL DEVELOPMENT
- ◆ NO PROHIBITED PROLIFERATION

THE US & THE REGION

- ◆ SANCTIONS RELIEF DELIVERED
- ◆ EVERY FRONT OF THE HUDNA HONORED
- ◆ RECONSTRUCTION MONEY DELIVERED

LIMITS Stated Up Front

seven things this framework does not claim

IT NEEDS TRUMP

- This runs on one man's personal diplomacy
- Nobody else has the appetite to own it or the standing to move the region
- He also has to get the entire region on board: the Arabs, Israel and Iran
- The architecture is **built to outlive him**, but nothing gets built without him

NOTHING IS TRULY IRREVERSIBLE

- Irreversibility is an ideal, constrained by politics
- Every element can be undone by a party willing to pay the cost
- What the architecture changes is **how slow, how visible, and how damaging** reversal becomes
- Finality has chargebacks, and geopolitics files more of them than finance does
- And finality covers acts, not conditions: compliance is continuous, so a party that stops performing ends the series, and ending the series can undo much of what it was building

NO CENTRAL ENFORCEMENT

- The institutions negotiate standards and produce receipts, not adjudications
- Enforcement is left to the **distributed anarchy of geopolitics**

A WEAK SECURITY GUARANTEE

- Nobody is trapped in this
- The largest source of leverage in any deal is the ability to walk away from it
- Staying has to be **worth more than leaving**, and that is the only thing holding it together

SANCTIONS RELIEF PRIMARILY AMERICAN

- Reality is that relief primarily runs through Washington's political calculations
- What the architecture supplies is a **pathway Washington and others can follow**, and regional partners with their own reasons to press for it

THE FAULT LINES ARE ENTRENCHED

- Israeli-Palestinian, Sunni-Shia, US-Iran, Arab-Persian, Islamic-Western
- The architecture **can only attempt to contain them**

DÉTENTE IS MUTUAL, NOT PROMISED

- Nothing guarantees regional actors won't undermine the pace of progress, or won't decide that détente and normalization aren't in their long-term interests
- It's a **north star, nothing more**

The architecture operates at the margins, where the worst outcomes are stumbled into.

"Depart from evil, and do good; seek peace, and pursue it."

— PSALM 34:14, KJV

"Blessed are the peacemakers: for they shall be called the children of God."

— MATTHEW 5:9, KJV

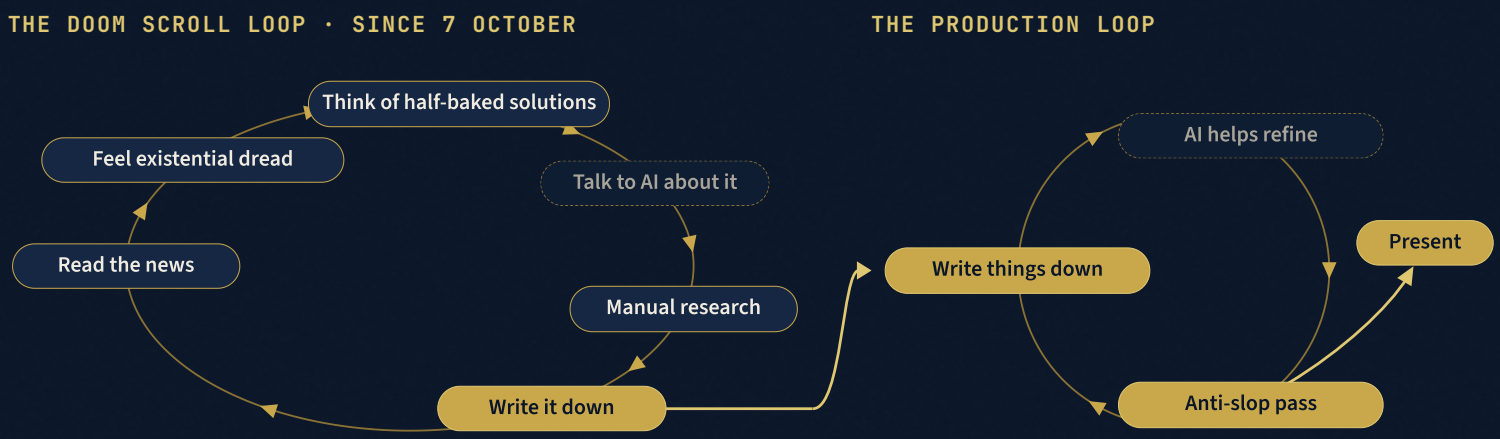

"And if they incline to peace, incline thou also to it, and trust in Allah."

— QURAN 8:61, PICKTHALL
